

Antifreeze Insulation Jackets

Freeze Prevention for Piping & Components

The Thermaxx Antifreeze Jacket is a removable insulation jacket that can be designed for dry or wet applications. It is custom fitted to protect pipes and components including valves, actuators, and steam traced components from freezing. A heat source may be required under the jacket.

Thermaxx Antifreeze Jackets provide multiple benefits for facilities:

- Freeze Prevention
- Increased Safety
- Energy Savings

Temperature	Inner Material	Insulation	Outer Material
30-40°F	EJ 1650	10mm Pyrogel	EJ 1650
0-30°F	EJ 1650	15mm Pyrogel	EJ 1650
-20-0°F	EJ 1650	20mm Pyrogel	EJ 1650
< -20°F	Custom	As Designed	Custom

Standard jacket color: Grey
